

Screenings...

Crystal Clear Imaging offers the following screening exams:

- **Coronary Calcium Scoring** - Which provides you with a numerical score that may predict a future coronary event.
- **CT Cancer Screenings** - Chest, Abdomen, Pelvis, Full Body.
- **Bone Densitometry** - A screening for Osteoporosis or "loss of bone mass".
- **Abdominal Aortic Aneurysm Screening** - Ultrasound scan that screens for the existence of an aneurysm in the abdominal aorta. The vast majority of people who have an aneurysm have no symptoms.
- **Stroke/Carotid Artery Screening** - Ultrasound scan of the carotid arteries that screens for fatty plaque build-up which can lead to strokes.
- **Peripheral Arterial Disease Screening** - Screens for peripheral arterial disease (plaque build-up) in the lower extremities which is linked to coronary artery disease.

Directions:

2100 Emmanuel Way is located off Middle Urbana Road in Springfield, about midway between Villa Road and Route 334.

From I-70, take 68 North (Urbana) to 334 East. Proceed on 334 East approximately 3 miles to the second traffic light at the intersection of 334 East and Middle Urbana Road. Turn right (south) onto Middle Urbana Road. The first road on the left is Emmanuel Way. Crystal Clear Imaging is located on the left at 2100 Emmanuel Way.

- **Nuclear Medicine • Ultrasound •**
- **MRI • Stereotactic Breast Biopsy •**
- **Open MRI—the only one in Springfield! •**

When you need diagnostic imaging, where you have it done is your choice.

The choice is *Crystal Clear*...
Your Image, Your Choice!

SCHEDULING

Crystal Clear Imaging has same day and next day availability for most procedures.

(937) 398-0501

Monday - Friday 8:00 am - 6:00 pm
Saturday 8:00 am - noon

Women's health is a high priority at Crystal Clear Imaging.

Here, you will find the most advanced mammographic technology available for the early detection of breast cancer — *Digital Mammography*.

Mammograms are performed and read in a timely manner, and all diagnostic mammograms are reviewed at the time of exam.

Also available, Bone Densitometry— a simple, safe, and painless diagnostic test to identify those at risk for Osteoporosis.

Our Stereotactic and Ultrasound Guided Breast Biopsies provide a less-invasive alternative to surgical biopsy. This involves precise targeting and tissue sampling of suspicious area(s) of the breast requiring only local anesthesia.

Great News!

CompuNet.
